**R-Series
Compact Loaders**
60 & 70 Platforms

***One Tough
Animal®***

BRING REVOLUTIONARY TO YOUR JOB.

More than ever, owners and operators depend on compact equipment to do more – in all kinds of applications – and new R-Series compact track and skid-steer loaders have been completely redesigned to meet the demand. With a total focus on quality, Bobcat® loaders offer uncompromising reliability and durability, enhanced performance, and an unmatched operator experience.

REVOLUTIONARY PERFORMANCE

These powerful loaders easily handle your most challenging jobs today, while giving you the confidence to meet your challenges tomorrow.

INCREASED LIFTING CAPABILITIES

R-Series loaders not only look tougher, they are tougher. Lift arms feature cast-steel sections for increased material strength and rigidity. They also have a slimmer profile to enhance visibility.

Newly optimized work group geometry improves lift capacity throughout your loader's range of motion. Increased lift height enables easy dumping into high-sided trucks and hoppers.

COUNTERWEIGHT READY

R-Series loaders readily accept frame-mounted counterweights to optimize lifting performance on tough jobs.

TWO-SPEED TRAVEL

Spend less time traveling. Move faster and get it done sooner.

IT'S ABOUT MAKING YOU **STRONGER.**

When it comes to performance, Bobcat skid-steer loaders and compact track loaders are in a class by themselves.

POWERFUL BREAKOUT FORCES

High-efficiency hydraulic pumps deliver more power matched to demand and provide leading breakout forces.

MORE TORQUE

Bobcat loaders reach maximum torque at a low rpm, minimizing stalling while saving time and fuel.

FAST CYCLE TIMES

Hydraulic pumps in Bobcat loaders are matched to cylinder size and loader lift capacity to provide fast cycle times.

REDESIGNED INLINE ENGINE

A new Tier-4, non-DPF Bobcat engine and durable direct-drive system provide the performance you need while reducing and simplifying routine maintenance.

- An innovative new fuel system that is more forgiving when fuel levels are low
- Improved cold-weather operation
- New fuel filter that lasts longer, and is easier to change and monitor
- Efficient fuel tank vent filter prevents debris buildup and damage
- New lift pump and self-priming fuel system
- Adjustment-free belts

PUT YOUR WORK ON SOLID FOOTING.

Since inventing the world's first true compact loader in 1958, Bobcat has constantly improved on its original concept: a tough, agile and versatile compact machine that can tackle an incredible number of jobs. Today, the innovation continues.

COMPACT TRACK LOADERS: HIGH FLOTATION AND TRACTION, LOW GROUND PRESSURE

Compact track loaders are heavier to deliver maximum pushing power. That weight is also spread out over a wider area to decrease ground disturbance and allow lifting of larger loads.

TOUGH TRACKS FOR TOUGH JOBS

Dual-flange front idlers and triple-flange wide rollers ride on rubber tracks to dampen ground vibrations and improve ride quality while producing less wear on the track. The large circumference of the rear idlers further decreases track wear while maintaining optimal contact for improved tension and less detracking.

- Hydraulic hoses are routed inside the undercarriage to reduce snags and impacts.
- The self-contained axle system contains a heat-treated inner bar for maximum strength.
- The hydraulic track tensioning system minimizes the chance of loosening and detracking.

TRACK OPTIONS

Bobcat offers seven different tread patterns to accommodate various applications and optimize your compact track loader's performance for the jobs you do.

Ask your Bobcat dealer about tires and tracks specifically designed for your work.

SOLID-MOUNTED UNDERCARRIAGE

The solid-mounted Bobcat undercarriage features a small number of moving parts to reduce required maintenance and stabilize both the loader and work group. It delivers the best possible grading performance.

5-LINK TORSION SUSPENSION UNDERCARRIAGE

Designed for the best combination of comfort and work performance, this patented suspension uses torsion axles to dampen vibration and provide a smoother ride that you can feel in the seat, on the floor and throughout the cab. The fifth link located on the rear axle provides additional stability when lifting or grading.

EASE OF CLEANOUT

A horizontally mounted grease track tension cylinder opens up more room between the carriage and track for easier cleanout. The undercarriage is sloped on both sides to leave behind material, such as sand, dirt, mud and debris, better than the previous design. Additionally, raised cutouts between the rollers allow for easier cleaning.

SKID-STEER LOADERS: QUICK-TURNING, COMPACT MANEUVERABILITY

Compact, nimble and able to pivot 360 degrees, Bobcat skid-steer loaders can easily maneuver in close quarters and bring responsive, well-balanced turns to the jobsite. R-Series skid-steer loaders have a wider wheelbase for ideal ride stability and performance in a compact machine profile.

TIRE OPTIONS

Bobcat has an extensive offering of pneumatic and solid loader tires. Choosing the best tire is important for machine traction, flotation, wear and overall performance.

MAINTENANCE-FREE CHAINCASE

Instead of spending time in the shop, spend time on the job with Bobcat skid-steer loaders. Many brands will tout the ability to adjust their loaders' drive chains. These periodic adjustments cost you in time, productivity and money. Bobcat has offered a better way for years in its skid-steer loaders: no adjustments.

COOLING

PUSH IT HARD. KEEP IT COOL.

As operators trust compact equipment to run longer and do bigger, more difficult jobs, better cooling is essential. The R-Series cooling system is completely redesigned for optimal operation and maximum uptime.

LARGER, REVERSIBLE FAN

The fan size is increased by approximately 50%, which achieves more cooling at a slower rotation. This consumes less power and reduces noise in the cab and around the machine. A reversible fan option purges debris buildup from the rear screen, reducing the need for manual cleaning. An auto mode reverses airflow automatically, and operator-controlled purge mode gives you the ability to reverse the fan at any time.

BOBCAT TOUGH

LARGER RADIATOR AND OIL COOLER

Increases cooling ability in most operating conditions.

PROTECTIVE STEEL TAILGATE

Heavy-duty steel louvers allow the airflow needed to significantly reduce temperatures. A steel screen inside the tailgate adds a second layer of protection.

BIGGER AUXILIARY HYDRAULIC HOSES

Auxiliary hydraulic hoses and tubelines on high flow models have increased in size from 3/4-inch to 1-inch diameter. Hydraulic oil can flow with less restriction, leading to cooler operating temperatures.

A white Bobcat S76 skid steer loader is shown from a side-front perspective. The lift arms are raised, and the Bobcat logo is visible on the side of the arm. The machine has large, treaded tires with orange rims. The background shows a construction site with a stone wall and a white tarp with 'Tyvek' and 'HomeWrap' logos.

LIFT ARMS

CAST-STEEL LIFT-ARM SECTIONS

R-Series loaders not only look tougher, they are tougher. Bobcat lift arms feature cast-steel construction for increased material strength and rigidity. Cast steel allows more material where it's needed, which provides greater strength. Because cast steel provides more strength with a slimmer profile arm, it also enhances visibility to the bucket corners.

STRONGARM YOUR WAY TO A PERFECT FINISH.

R-Series loaders have an innovative new lift-arm design with strong cast-steel sections, plus newly optimized linkages and work group geometry. As always with Bobcat loaders, this durable, patented lift-arm design gives you a choice of lift path to help you meet the unique demands of your job.

VERTICAL LIFT PATH

A vertical lift path provides higher lift capacity and more reach at full lift height than radius lift path, keeping the load closer to the machine while you raise the loader arms.

Because you achieve maximum reach at full lift height, it's easier to clear high-sided truck boxes and hoppers. It's also better for placing heavy pallets of block or sod.

RADIUS LIFT PATH

A radius lift path provides maximum reach at truck bed height. Arm movement forms an arc. More than 80% of that arc delivers better reach at truck bed height. A radius lift path excels in jobs at mid-range heights, like dumping over a wall, backfilling or unloading flatbed trucks.

A man with a beard and short brown hair is sitting in the driver's seat of a Bobcat loader cab. He is wearing a grey button-down shirt over a white t-shirt and blue jeans. He is smiling and looking towards the camera. His right hand is on the steering wheel, and his left hand is on a red-handled control lever. The cab interior is visible, showing a black seat, a gear shift, and various controls. The exterior of the cab is black with a red handle. The background is a clear blue sky.

COMFORT

COMFORT IS **A MUST** AND YOU GET **THE MOST.**

Few tools are more useful than a Bobcat loader, and when you trust your machine with more work, you spend more hours in the cab. Today's operators require more comfort, and R-Series loaders deliver an unmatched cab experience that keeps productivity high.

ONE-PIECE SEALED AND PRESSURIZED CAB

The cab design provides a near-seamless interior for a new level of operator comfort. The roomier design offers a sealed and pressurized environment that repels dust and dirt in the cab, isolates the operator from engine and hydraulic noise, and enhances the efficiency of heating and air conditioning.

FRONT DOOR SEAL

A specially designed front door seal increases cab pressurization to repel dust and keep clean heated or air-conditioned air inside.

1

AN INDUSTRY-LEADING OPERATOR EXPERIENCE

1. LARGE ENTRY

On machines with enclosed cabs, large swing-open doors provide ample room for entry and exit. A wide step provides sure footing in and out of the cab.

2. MORE INTERIOR STORAGE

There are plenty of cupholders and cubbies, and a large storage compartment.

3. PUSH-BUTTON CONTROLS

Bobcat puts major controls within easy reach and at eye level.

4. RADIO OPTIONS

There are multiple options including stereo radio and auxiliary audio output or the touch display with integrated radio with Bluetooth® connectivity to stream audio from your device.

5. AUTOMATIC HEAT AND AIR CONDITIONING

Heat and air conditioning automatically adjust to maintain a consistent temperature. Available with select option packages.

HYDRAULICALLY CUSHIONED CYLINDERS

Tilt cylinders are cushioned at the lowered, full dump and rollback positions. This reduces noise and increases comfort.

6. HEATED AIR-RIDE SEAT

This optional seat is upholstered in comfortable, breathable cloth and equipped with operator controlled heat. Provides peak operator comfort, with air suspension that adjusts to your weight, smoothing out bumps on the jobsite.

CONTROLS THAT MOVE WITH YOUR SEAT

On machines with Selectable Joystick Control (SJC), the joysticks move with the seat. This helps reduce arm movement and fatigue. Joystick mounts slide forward and backward, adjusting to different-sized operators.

Experienced operators know that instrumentation can make the difference between a good machine and a great machine.

Access detailed information through the display, including monitoring, troubleshooting and error conditions, including system voltage, engine oil pressure, engine coolant temperature and more.

Get convenient visibility to all machine vitals to better manage maintenance, utilization, productivity and more.

ON-SCREEN ATTACHMENT SETTINGS CONTROL

To further enhance operator productivity, the display provides tips and information for using select attachments. You can even monitor and position select attachments, such as the laser-guided grader or box blade.

TOUCH DISPLAY

New Bobcat display options for R-Series loaders make it easier than ever to change settings, match performance to the job and continuously monitor your machine's maintenance needs.

OPTIONAL 7-INCH TOUCH DISPLAY

It's the most advanced in-cab display for compact equipment. With the optional touch display for R-Series loaders, you'll receive detailed machine information and experience unprecedented device connectivity. The wide, easy-to-use touch screen delivers machine performance information for more efficient operation and improved productivity. The display also supports multiple languages.

TOUCH DISPLAY

GLOVE SENSITIVITY

The screen works with your light-duty work gloves, providing convenient touch operation without the inconvenience of glove removal.

SCREEN DURABILITY

The high-resolution, full-color touch display is designed to work with open cabs and extreme weather. The tempered glass screen is rated 9H on the Mohs hardness scale for a high level of scratch protection. The display is pressure-washer tested to ensure superior waterproofing that stands up to wet, humid environments.

PHONE AND DEVICE CONNECTIVITY

An integrated radio with Bluetooth allows for a wide range of on-the-job entertainment – plus the ability to make and receive hands-free phone calls.

ACTIVE NOISE CANCELING DURING PHONE CALLS

Active noise canceling on the high-fidelity in-cab microphone allows call recipients to hear operators easily and clearly.

DETAILED FAULT CODE INFORMATION

Save time troubleshooting with more detailed fault code information. You'll also see which codes are currently active, what time inactive codes occurred and the name of the operator who was logged in when the fault code occurred. For select codes, you can access extended descriptions that give you information on the root cause of the issue and its impact.

Rearview camera display

JOG SHUTTLE

If your hands are wet or you are working with dirty gloves, the jog shuttle provides an easy backup input.

OTHER INNOVATIVE TOUCH-SCREEN FEATURES

- Import contacts from your mobile phone.
- Keep a customizable contacts list for each operator.
- Access detailed operator statistics and provide jobsite security with 20 unique operator codes.
- Enable feature lockouts and maximum travel speeds to customize the experience per operator.
- Track engine hours, idle hours and fuel usage by operator.
- Set a new clock for each job to track machine productivity and employee performance.
- Add favorite screens for easy access.
- Unique radio includes presets for each operator.
- USB power port keeps devices charged and supports MTP for playing music.
- Auxiliary input via 3.5 mm jack.
- An ambient light sensor automatically adjusts screen brightness.
- Timed screen lock allows a set period for code-free machine restarts.

STANDARD DISPLAY

5-INCH STANDARD DIGITAL DISPLAY

The easy-to-read cab display panel provides full-featured machine interaction and monitoring capabilities from right in the cab. Run your loader more efficiently and solve more problems in the field with on-screen content. The display also supports multiple languages, as well as imperial and metric units.

OTHER STANDARD DISPLAY FEATURES

- Monitor and change attachment settings.
 - Laser positioning for laser-guided grading attachments
 - Sonic tracer/slope sensor control
- Integrated rearview camera display automatically switches your display to the camera view when traveling in reverse (rearview camera required).
- Jog shuttle control enables easy navigation and input.
- Hide-away navigation bar helps you quickly move from screen to screen.
- Set one owner profile and up to four operator profiles.
- Password-protected keyless start eliminates downtime from lost keys.
- Activate or deactivate auto throttle.
- Activate or deactivate auto idle.
- Track engine hours from any screen on the display.
- Timed screen lock allows a set period for code-free machine restarts.

VISIBILITY

YOU HAVE THE ULTIMATE VANTAGE POINT.

The Bobcat approach to visibility is simple. With each generation of equipment, we maximize open viewing areas and improve sightlines. Through innovative engineering, robust materials and cutting-edge manufacturing, our newest Bobcat loaders provide the best view on the jobsite.

IN FRONT

Comfortably see your work from the seat through a single curved pane of glass. Keep working at night or in darker environments with powerful LED lighting. Hoses and fittings have been repositioned on the tilt cylinders to further enhance your visibility.

The cab-forward design places the operator area closer to the attachment, giving you a better vantage point to see your work.

STANDARD LED LIGHTS

Bright, efficient and reliable standard front and rear LED lights provide far-reaching visibility in low light levels.

PREMIUM LED LIGHTS

Upgrade to optional premium LED lights that wrap around the cab's upper corners. This gives you a wider beam to illuminate more of the jobsite.

Optional premium LED lights

TO THE REAR

REAR VISIBILITY

The optimally sized rear window and low tailgate provide an ideal view behind the machine.

REAR CAMERA

All R-Series loaders come rear camera ready. When installed, optional rear cameras integrate seamlessly into R-Series displays. There's no need to have another screen taking up room in the cab. You can display the rear view automatically (when you travel in reverse), on-demand or continuously.

UP TOP

A top window with a large viewing area gives you an unbeatable view when raising a load above the cab.

TO THE SIDES

CLEAR-SIDE ENCLOSURE OPTION

Maneuver more confidently. Enhance your productivity. Easily see to the sides of your machine. A new, optional enclosure maximizes visibility by removing steel mesh screens from the side windows. The mesh-free windows are made from $\frac{3}{8}$ -inch thick polycarbonate with an abrasion-resistant coating to allow the optimal view you demand with the durability you expect.

SIDE VISIBILITY

By repositioning the stabilizer linkage to the rear of the machine, vertical lift R-Series loaders maximize side visibility, allowing the best possible view to the wheels or tracks.

SIDE LIGHTING KIT

Optional side lights are integrated into the machine design, with improved placement and protection against jobsite debris.

TAKE CONTROL YOUR WAY.

Bobcat offers operators intuitive, precise and adaptable control options to maximize your productivity and put you in total control of the task.

Selectable Joystick Control, or SJC, offers low-effort hand control of all machine work group functions.

ISO or H patterns can be easily activated with the push of a button inside the cab.

SELECTABLE JOYSTICK CONTROL (SJC)

ADAPT PERFORMANCE TO THE JOB.

These low-effort joysticks allow the operator to control all machine functions with their hands. Bobcat offers the most advanced SJC on the market, loaded with several exclusive features that adapt the loader's performance to specific job requirements:

Drive Response Mode: Drive response mode allows you to choose how quickly the drive responds to joystick movement.

Speed Management: Simply "dial in" your required travel speed in small increments to match speed to your operation requirements. A full range of joystick motion gives you precise control of machine movements at slow speeds while maintaining maximum driveline torque and full hydraulic power.

Steering Drift Compensation: Steering drift compensation keeps you on a straight path by helping you make minor adjustments to the steering. It's beneficial when you side-shift certain attachments, such as planers or trenchers.

Horsepower Management: Bobcat horsepower management automatically maximizes pushing and digging power while minimizing your chance of stalling. Unlike with other anti-stall systems, you can obtain maximum engine and drive torque, and if you prefer to work without it, simply disengage with the push of a button.

STANDARD CONTROLS

TRADITIONAL HAND AND FOOT CONTROLS

This tried and true system is still a popular style of control today. A lever controls the drive on each side independently, while your feet control the lift arms and bucket. The farther you stroke the lever, the faster you go. The shorter the stroke, the more torque that is delivered to the wheels or tracks, allowing maximum power for pushing into a pile.

Low-effort, low-fatigue foot pedals offer comfort for long days and precise, responsive control. In the cab, the flat floor gives your feet more freedom to move for comfortable positioning and less fatigue from long hours in the cab.

ALL THE POSSIBILITIES ARE IN FRONT OF YOU.

Even if you just want to dig today, tomorrow's job could demand more from your machine. Bobcat loaders have your business expansion built right in. Whether it's breaking concrete, breaking down buildings or bringing computer-generated designs to life with a 3D grade control system, Bobcat attachments help you take on new jobs and get more use from your machine.

BOBCAT-BUILT TO BOBCAT STANDARDS

Bobcat is the only major compact equipment manufacturer that also manufactures a majority of its own attachments. This means they are engineered to be perfectly integrated with the electronics, hydraulics and geometry of your Bobcat machines.

MULTI-CARRIER VERSATILITY

You can share some attachments between Bobcat excavators, VersaHANDLER® telescopic tool carriers, compact track loaders and Toolcat utility work machines. This gives you the most versatility for your dollar and improved profitability.

FINGERTIP CONTROLS

Fingertip controls make your attachment operation comfortable and controllable, and allow attachment adjustments while driving.

- The detent feature allows your attachment flow to be engaged continuously without needing to hold the switch. Flow can be locked in both directions. It's handy for attachments like sweepers, soil conditioners and tillers that can be operated in either direction.
- Variable/max. flow allows variable, or “featherable,” flow to be used for grapples and combination buckets to slowly move the cylinders; or choose a maximum flow rate to quickly shake the dirt from an auger bit.

HIGH-FLOW HYDRAULICS

Get more hydraulic power to boost production of attachments like the Bobcat flail cutter, trencher, planer and stump grinder. Machines with this option have two flow ranges so attachments that require lower flow can still be used by selecting standard flow mode.

BETTER MACHINE INTEGRATION

Smart hydraulics allows Bobcat machines to identify the attachment and lock out non-required functions (like high flow) to limit damage to attachment and machine.

Some attachments that perform best with high flow will automatically engage high flow, ensuring maximum performance and great results at the end of the job.

KEEP IT WORKING AND KEEP WORKING.

R-Series machines make it easy to perform regular maintenance – so you can **protect your productivity from unplanned downtime**. And whenever you do require service, components are easy to find and reach, enabling you to quickly get back to work.

EASY ROUTINE MAINTENANCE

Engine checkpoints are within easy reach, and preventative maintenance is quick and simple with R-Series loaders.

ONE-PIECE, TIP-UP CAB

When it's time for maintenance or repairs, the entire R-Series cab lifts out of the way to provide improved service access – with hardware on the cab exterior for easy removal.

PROTECTED BATTERY WITH REMOTE JUMPSTART

In R-Series loaders, the battery is located under the cab. Lift the one-piece cab away for easy access. This service location protects the condition of your battery and provides more room for component access in the engine compartment. A remote terminal, located in the engine compartment, makes it easy to jumpstart the loader if needed.

BOBCAT PROTECTS YOUR UPTIME.

It's the foundation of your productivity and the backbone of Bobcat loader design. R-Series loaders are backed by a total focus on quality. The new R-Series loaders bring uncompromising reliability and durability to the job: toughness you can see and smart designs that protect your ability to work steadily.

MACHINE PROTECTION

Bobcat loaders monitor engine and hydraulic functions. If conditions risk damage to the engine or hydraulic components, the system will alert the operator and, if necessary, de-rate engine power as well as hydraulic flow. It still allows the operator to complete the job at hand or move the loader to an area for diagnosis.

SELF-DIAGNOSTICS

Track machine performance in real time and access historical machine alerts via the bright, easy-to-read LCD monitor.

SEALED CONNECTORS

Bobcat loaders won't let you down. All the controls and electrical systems are engineered for durability and peace of mind. Bobcat electronics feature watertight, corrosion-resistant connectors.

AUTOMATIC LIGHT SHUTOFF

The lighting circuit automatically shuts down to prevent accidental battery discharge.

ELECTRONIC PROTECTION

Bobcat electronics meet or exceed IP67 requirements for sealing, moisture, shock and vibration. Work in tough, humid conditions with less worry about corrosion, or power wash your loader without wondering if it will start when you are finished.

PROTECTED HOSES AND QUICK COUPLERS

The integrated, pressure-release quick couplers are mounted directly into the front of the lift arm – with no exposed hoses to damage. A steel guard extends beyond the coupler block, protecting it even further.

BOB-TACH SYSTEM IMPROVEMENTS

A new cast-steel Bob-Tach attachment mounting system provides a stronger connection point, with more metal where it's really needed. It has fewer welds overall, plus openings that allow dirt and debris to pass through.

FEATURES ON DEMAND

Your authorized Bobcat dealership can activate optional features in an instant, as your work demands and your budget allows. There is no installation. No waiting. Just contact your dealer to activate a new feature, and you're ready to work. Available on select models.

- High-flow auxiliary hydraulics
- Two-Speed travel
- Reversible fan
- Dual-direction bucket positioning
- Automatic ride control

OWNER PORTAL

The Bobcat Owner Portal is your key to access and interact with machine data to better utilize your machine while making maintenance and asset management more efficient.

Bobcat®

MACHINE IQ[®]

WIRELESS COMMUNICATIONS

Machine IQ uses electronic communications technology to keep you connected to your machine's status at any time, from a computer or mobile device. Your Bobcat machine includes a device that enables you and your dealer to monitor machines remotely for:

- Unplanned maintenance
- Planned maintenance
- Machine security
- Reporting and analytics
- Basic telematics

BOBCAT MAXCONTROL REMOTE OPERATION

Use your iPhone® to control your machine remotely. Bobcat MaxControl remote operation is an iOS app that makes operating your machines easier and more convenient than ever before. It acts like an extra set of hands when help is limited. Two-person jobs can now be handled by one worker, and you can say goodbye to unnecessary trips in and out of the cab.

RADIO REMOTE CONTROL

Loaders equipped with Selectable Joystick Control can be operated by a remote-control system, without having to have an operator in the cab. This can be beneficial to people operating in hot or dusty environments or when you would rather work outside the machine.

The remote control is completely portable. If you have multiple machines, you can quickly remove the remote from one machine and attach it to another in minutes. Sealed and protected electronics can withstand the harshest environments.

YOU ARE ONE TOUGH ANIMAL.®

Everything we put into Bobcat equipment is designed to make more of whatever you bring to the job. Whether it's strength, versatility, speed or agility, it's built around you.

Certain specification(s) are based on engineering calculations and are not actual measurements. Specification(s) are provided for comparison purposes only and are subject to change without notice. Specification(s) for your individual Bobcat equipment will vary based on normal variations in design, manufacturing, operating conditions, and other factors.

Bobcat is a Doosan company. Doosan is a global leader in construction equipment, power and water solutions, engines, and engineering, proudly serving customers and communities for more than a century.
